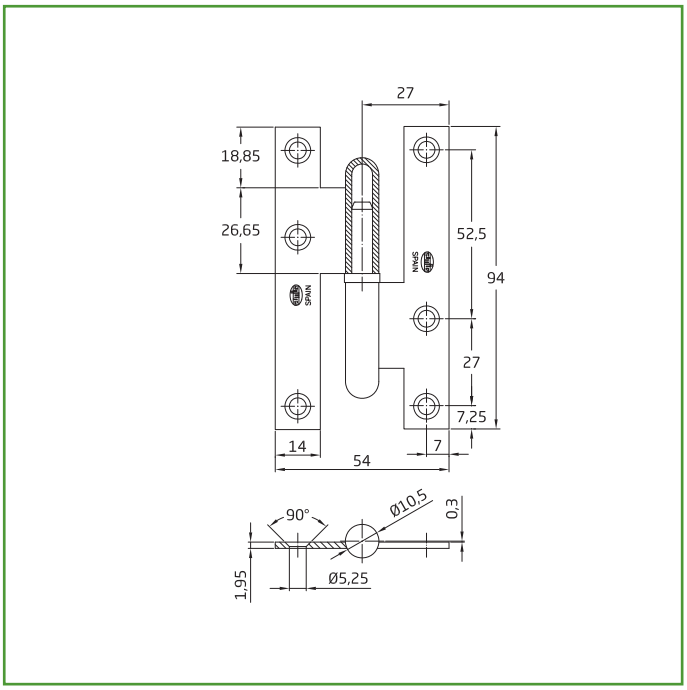
Mod. 403
HINGE



Measurements: 95 x 52 x 2 mm

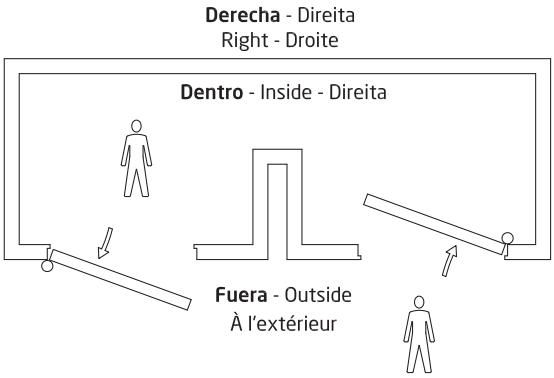
Material: Steel

Finish: Zinc plated

Code: 295

Presentation: Without individual EAN

EAN unit:



Features

Hinge made of high quality steel, strong and durable. Without finials and with square edge. Opening direction: Right.

Ecofriendly

At AMIG we aim to offer the best quality in our products without harming the environment. For this reason, we work to comply at all times with environmental regulations in our processes, as well as by implementing the Comprehensive Management System (SIG) for packaging waste.

Assembly instructions / Utilities

These types of hinges are the most used in doors and windows due to their good operation and ease of use. We can find them of different sizes and types. In most cases, to place a hinge, a previous hole must be made where the wings fit and for this reason the difficulty of the installation is greater.

Care and cleaning

For a correct maintenance of the hinges, it is recommended to lubricate and regularly tighten the retaining screws. The hinge's cleaning must be always done with non-corrosive products, nor detergents, solvents, or alcohols. If, even with a correct maintenance, the hinges don't have a proper performance, these must be replaced.
