1

Calcolare l'altezza desiderata per la composizione e di conseguenza tagliare alla misura il profilo montante
Calculate your height desired for the composition and then cut the upright

$$A = H_{\text{totale}} - 94$$

2

MNKT03

Inserire il giunto nella cava e ruotare fino al bloccaggio
Insert a joint in the groove and rotate untill it locks

MNKT03

Inserire il traverso superiore e bloccarlo con le viti
Insert the upper profile and lock it with screws

MGKT06

Ripetere lo stesso procedimento con il traverso intermedio posizionandolo all'altezza desiderata
Repeat the same procedure for middle profile positioning to the height desired

Repeat the same procedure for middle profile positioning to the height desired

MGKT01

Assemblare i componenti per la regolazione dell'altezza come da immagine
Assemble the components for height adjustment as shown in the image

3

Fissare al muro il primo giunto superiore all'altezza desiderata
Fix to wall the first upper joint at the desired height

Portare la struttura al giunto fissato e segnare sul muro la posizione del giunto intermedio dove inserire il tassello
Bring the assembled structure to the fixed joint and mark the position of middle joint on the wall where to insert expansion plug

Considerare che la distanza 'B' dipende dalla misura dei ripiani.
 $B = L \text{ ripiani} + 30\text{mm}$
Please consider distance 'B' depends by shelves lenght.
 $B = L \text{ shelves} + 30\text{mm}$

4 MNKT04

Per ripiani in legno procedere nel seguente modo:

For wooden shelves proceed in this way:

Posizionare le staffe all'altezza desiderata bloccandole, appoggiare il ripiano in legno e fissarlo con le viti autofilettanti

Position brackets to the height desired blocking them, place the wooden shelf and secure it with self-tapping screws

5 MNKT05

Per ripiani in vetro procedere nel seguente modo:

For glass shelves proceed in this way:

Posizionare le staffe inferiori all'altezza desiderata bloccandole, appoggiare il ripiano in vetro e fissarlo con il biadesivo. Successivamente inserire le staffe superiori e bloccarle.

Position the lower brackets at the height desired blocking them, place the glass shelf and fix it with the double-sided tape. Then insert the upper brackets and block them.

Assolutamente si consiglia per una migliore riuscita di posizionare i ripiani con la livella.
It is absolutely recommended for a better result to positioning the shelves with the spirit level.

6 MNKT02

Per KIT APPENDERIA in legno procedere nel seguente modo:
For HANGER KIT proceed in this way:

Posizionare le staffe all'altezza desiderata bloccandole, inserire il profilo appenderia
Position brackets to the height desired blocking them, insert hanger profile

7 MNKT18

Per cassettera con fissaggio a muro procedere nel seguente modo:

For wall fixing drawer proceed in this way:

Fissare al muro la cassettera con la propria attaccaglia. Posizionare le staffe inferiori appoggiandole sul fondo del mobile e le staffe superiori appoggiandole sopra. Serrare quindi le staffe e avvitare il tutto con le viti autofilettanti.

(l'uso della staffa a muro è riservato al montatore della struttura).

Lock the cabinet to the wall with its hanger. Position the bottom brackets placing them on the bottom of the cabinet and the upper brackets placing them on top.

Then tighten the brackets and screw everything together with the self-tapping screws. (the use of the wall bracket is reserved for the installer of the structure).

8 MNKT24

Per cassetiera self-standing con staffa nascosta procedere nel seguente modo:
For self-standing drawer with hidden bracket proceed in this way:

Posizionare le staffe come indicato in figura, in appoggio tra di loro: tenere conto dell'altezza del mobile per far sì che la staffa dritta non sia visibile.

Positioning brackets like upper picture, supporting each other: consider drawer's height for hiding to ensure that the straight bracket is not visible.

Fissare la cassetiera con le apposite viti alle staffe. Assicurarsi che tutto il montaggio venga effettuato con la livella per verificare l'orizzontalità.

Fix the drawer with the appropriate screws to brackets. Make sure that all assembly is done with a spirit level to checking horizontality.

9 MNKT23

Per configurazione con isola self-standing procedere nel seguente modo:
For self-standing island configuration proceed in this way:

Eseguire i prefori con punta Ø5 una volta decisa la posizione della struttura.
Inserire le viti M4 come da immagine e serrarle con il doppio dado.

*Drill the pre-holes with a Ø5 bit once the position of the structure has been decided.
Insert the M4 screws as shown in the picture and lock them with the double nut.*

Inserire il montante e fissarlo.
Positioning the upright and lock it.

Ultimare il montaggio avvitando il tappo superiore.
Finishing the assembly screwing upper cap.

10 MNKT19

Il supporto mensola intermedio va utilizzato solo ripiani in legno di spessore 16mm, si consiglia di utilizzarlo sempre quando il ripiano è lungo 120mm:

Mid fixing element for shelf has to be used just for wooden shelves with a thickness of 16mm,

it is recommended to always use it when the shelf is 120mm long:

Identificare la posizione dove inserire il tassello nel muro in base all'altezza della vostra composizione.

Identifying the position where to insert the plug into wall according to the height of your composition.

Eseguire preforo Ø6, inserire il tassello e montare il supporto come in figura.

Drill with Ø6 bit, insert the plug and assemble the support as shown in the figure.

11 MNKT23

Utilizzare il kit adattatore top come di seguito illustrato:
Use the worktop connection kit as shown below:

Eeguire i prefori Ø6 per i corrispettivi tasselli e bloccare le staffe di fissaggio.
Drill the Ø6 pre-holes for the corresponding plugs and lock the fixing brackets.

Inserire i traversi superiori nelle staffe fissate a muro.
Insert the upper crosspieces into the brackets fixed to wall.

Pre-montare la struttura in modo tale da identificare la posizione dove fissare gli adattatori top. Quindi rimuovere lo strato di biadesivo e ultimare il fissaggio con le viti.

Pre-assemble the structure in order to identify the position where to fix the worktop adapters. Then remove the double-sided adhesive layer and finish fixing with the screws.

Prima di assemblare i montanti montare le piastrine e le viti M6X8.
Before assembling the uprights mount the brackets and M6x8 screws.

Ultimare la composizione inserendo i montanti fissandoli ai traversi e alle basi.

Complete the composition by inserting uprights fixing them to the side beams and bases.

- 12** Nel caso la struttura avesse incluso dei componenti elettrici per l'illuminazione dell'ambiente seguire la procedura per il corretto collegamento:
If the structure has included electrical components for ambient lighting, follow the procedure for correct connection:

il profilo montante nella configurazione 'floor to wall' possiede due diverse gole dove far correre o meno i collegamenti elettrici. Nella gola ① si eseguono le connessioni per l'illuminazione del palo; nelle gole ② si fanno passare i cavi delle lampade dei ripiani.

the upright profile in the 'floor to wall' configuration has two different grooves where the electrical connections run or not. In groove ① the connections for lighting the pole are made; the cables of the shelf lamps are passed through the grooves ②.

SEZIONE A-A
 SCALA 1:1

Il profilo diffusore LED è composta da due materiali, uno più rigido al centro e due alette più morbide all'esterno dove poter inserire e rimuovere facilmente i cablaggi.

The LED diffuser profile is composed of two materials, one stiffer in the center and two softer lugs on the outside where you can easily insert and remove the connections.

Uscire con il cablaggio dal piedino inferiore e collegarlo ad una corretta fonte di alimentazione.

Exit the wiring from the adjustable leg e connect it to a proper power source.

CONDIZIONI DI VENDITA GENERALI

Per il montaggio dell'articolo LINEA, soluzione TOP-WALL, l'azienda fornisce dei "kit-standard" collaudati e testati che non devono subire alterazioni nelle loro componenti e quantità.

Sarà cura del responsabile del montaggio accertarsi che i colli dei relativi kit al momento della consegna siano integri e non mostrino nessun segno di alterazione.

L'azienda non fornisce alcuna ferramenta per il fissaggio dell'articolo a superfici verticali \ orizzontali rigide.

Nel caso in cui l'articolo venga fissato a muro il responsabile del montaggio dovrà accertarsi che venga utilizzata una ferramenta idonea in funzione del tipo di opera muraria o di rivestimento murario contro il quale ci si deve ancorare (cartongesso, cemento, legno).

Il cliente dovrà farsi carico di verificare che in prossimità dei punti di fissaggio non avvenga il passaggio di linee impiantistiche come impianto elettrico o idraulico che potrebbero venire danneggiate o creare problemi di sicurezza.

Si raccomanda inoltre una visita preliminare prima dell'installazione al fine di identificare la posizione più corretta e priva di impedimenti o rischi alla normale circolazione delle persone.

Prima di intraprendere il lavoro di montaggio il responsabile dell'installazione deve:

a-Visionare le istruzioni di montaggio ed attenersi scrupolosamente a tutte le relative prescrizioni e indicazioni

b-Ogni garanzia decade qualora il prodotto venga installato in maniera non conforme o con l'aggiunta o la sottrazione di materiali rispetto quanto previsto

c-Controllare lo stato della merce da installare

d-Verificare l'idoneità dell'area per il deposito e la movimentazione del materiale, onde questo non abbia a subire danni

Il responsabile dell'installazione deve effettuare tutte le operazioni di montaggio in conformità e nel rispetto delle vigenti norme di sicurezza

Si raccomanda di valutare con estrema attenzione i modi per il tiro in sito (quando necessario) della merce tenendo ben conto delle dimensioni, del peso e delle peculiarità specifiche della stessa nonché di tutti i potenziali ostacoli che si potrebbero incontrare tra il luogo della consegna e il punto di installazione.

Il prodotto non deve venire trattato con solventi aggressivi ma solo con panni umidi non abrasivi.

Tutte le operazioni di progettazione logistica e movimentazione dal momento della consegna restano comunque sempre a carico del cliente o dove presente, del responsabile dei lavori, nel rispetto del POS e di tutte le normative vigenti .

GENERAL TERMS OF SALES

For assembling of LINEA, TOP-WALL solution, the company supplies the "standard kits", tested and approved, that do not have to be modified in terms of components and quantities.

It's up to the person responsible of assembling the structure to make sure that the units of relative kits are intact and do not show any sign of alteration upon delivery.

The company do not supply any kind of hardware used to fix the structure to vertical or horizontal surfaces.

In case of fixing the structure to the wall, the person responsible for the installation has to make sure that the operations are done using suitable hardware in dependence of the type of walling or wall covering on which it is going to be fixed (plasterboard wall, concrete, wood coating...).

The customer has also to verify that, in corrispondence of the points the structure is fixed to, is not to be found any sistem plant, such as electrical wiring or water and sanitary piping, that could be damaged and therefore create security issues.

It is also recommended a preliminary evaluation visit in order to identify the most appropriate position for the structure, that does not interfere or create any sort of risk to people and their everyday life movements.

Before starting the assembly the responsible of installation has to:

a - Read carefully the assembly instructions and pay attention to comply to all its indications and regulations.

b - The warranty is nullified in case the product is installed not complying to the instructions or if components are added or subtracted to the original structure.

c - Verify the integrity of the items to be installed.

d - Verify the compliance of the area designed for the storage and handling of the material, so that the latest does not incur in any sort of damage.

The person responsible of the product installing has to carry out all the operations in compliance with current safety standards.

Is recommended to carefully evaluate the transportation to the installing site (when necessary) of the product paying attention to its dimensions, weight and its specific features as well as to all potential obstacles that can be found to the way from the place of the delivery to the one of installation.

The product care must never be carried out with aggressive solvents but only with not abrasive wet cloth.

All the logistics and handling of the product from the moment of delivery are, in any case, up to the customer or, if appointed, to the operations manager, in compliance to the Health and Safety Plan and all the current regulations.
