

SMART MINI

SURFACE MOUNTING

Smart, Smart Mini and Smart Plus are cabinet spotlights equipped with lithium battery and rechargeable with charger with micro-USB socket (not included). The installation does not require holes for the passage of cables, just apply the magnetic bracket to the shelf with the screws provided. The PIR sensor, integrated with both models, allows the lamp to be switched on when the door is opened. The LED source is available with Natural colour temperature (4000K).
